

**Project #1** scenario card

**L3**

You are working on a project with Emily in Geometry class. Your project is to create a model of a dodecahedron by Friday. On Wednesday at 3rd period, you are going to put the pieces together. She is bringing the measurements of each piece of the shape to your scheduled meeting on Wednesday. You are to bring the glue, poster board, exacto knife and the straightedge. At 3rd period, you have not gathered your materials.

What do you do?

**Project #2** scenario card

**L3**

You are working on a biology project with Kurt. Your task of the project is due now. Your task was to label all the body parts on an illustration of a fish. Kurt was to write answers to a worksheet on the fish's digestive system. You still together have to complete a sheet on the fish's respiration, another sheet on its circulatory system and an illustration of the fish for the outside of the folder.

How are you going to work this out?

**Project #3** scenario card

**L3**

You and your partner have been given an assignment in English class. You can develop a poster, a power point, a video, a song, or artwork to represent one theme within the book you are reading.

Of those choices, you think it would be best to do \_\_\_\_\_.

Your partner would rather do a different choice.

How are you going to work this out?

**Project #4** scenario card

**L3**

You and your partner have been given an assignment in English class. You two decided to create a power point that describes the themes within a certain book. You did one half of the power point slides, and your partner did the other half. When you meet to share your work, you do not like some of the slides that your partner created.
