

Sometimes I need to work with a co-worker to complete a project. This will happen in the future if I work as a graphic artist as well.

I can try to work with a co-worker here at school so that I have this skill when I leave school.

To work successfully with a peer, I will:

- 1) Meet and discuss the project and the deadline,
- 2) Determine who will do which parts of the project and decide when we will meet again,
- 3) Set deadlines for the parts of the project and put my parts on my agenda,
- 4) Do my parts, following my agenda,
- 5) Meet with my peer to combine our parts and to make a plan to finish
- 6) Finish the last parts of the project and turn it in.

This plan can help me be a good graphic artist when I am older!
